

We are an internationally active, medium-sized trading company for electro-acoustic components and have been known as a reliable partner in the areas of alarm and security, telecommunications, automobiles, consumer and capital goods for over 45 years.

As part of a team expansion, we are looking for an experienced person to start as soon as possible

Electronics Technician (f/m/d) for the area of Technology and Quality (fulltime)

- communications electronics technician, electronics technician for devices and systems -

The Tasks

- incoming goods inspection with the help of common measurement and testing technology
- processing of technical customer inquiries and complaints, also in the form of project and development work
- preparation and comparison of technical documents such as data sheets and test reports
- solution- and result-oriented exchange of information with the international production plants

Your Competencies

- very good technical knowledge in the fields of electronics, electrical engineering, electroacoustics and sensors
- confident in understanding and implementing legal requirements and standards
- organized and structured work processing
- team and communication skills
- fluency in written and spoken German and English

Our offer

- an exciting position in an established, globally acting company
- the opportunity to actively shape processes and thus your own working environment
- a fair salary and 30 days vacation
- flextime and mobile working as building blocks of a flexible working time model
- a working atmosphere, characterized by family friendliness, empathy and a great sense of community

We have aroused your interest? ... then just get in touch with us! Let us know who you are, why do you fit in our team and when we can start planning with you.
